📄 SUMMARY

Cloud Engineer with 3+ years of experience designing, deploying, and supporting scalable cloud infrastructure across enterprise environments. Experienced in Google Cloud Platform (GCP), Amazon Web Services (AWS), Kubernetes, Docker, Terraform, Jenkins, Linux, CI/CD automation, and Infrastructure as Code. Skilled in cloud migration, container orchestration, monitoring, networking, and DevOps automation. Strong background collaborating with development teams to build secure, highly available, and cost-efficient cloud platforms.

🏢 PROFESSIONAL EXPERIENCE

Weg Works (www.wegworks.com) | Client: Albertsons Companies Inc,

06/2025 – Present

Software Engineer | Cloud

- Designed and maintained cloud infrastructure on Google Cloud Platform supporting enterprise applications with high availability and scalability.
- Built Infrastructure as Code using Terraform to provision Compute Engine, networking, IAM policies, and managed cloud resources.
- Automated CI/CD pipelines using Jenkins, GitHub Actions, and GitLab CI, reducing deployment time by over 60%.
- Managed Kubernetes clusters (GKE) for containerized microservices, improving deployment consistency and reducing infrastructure downtime.
- Configured Cloud Monitoring, Logging, Prometheus, and Grafana dashboards to proactively monitor production workloads.
- Optimized cloud resource utilization, reducing infrastructure costs through rightsizing and automated scaling policies.
- Worked closely with software development teams to troubleshoot cloud infrastructure, networking, and deployment issues.

Cognizant | (Daimler Truck Financial Services), Cloud Engineer

10/2022 – 01/2024

- Supported cloud migration initiatives by deploying enterprise applications from on-premises environments to Google Cloud Platform and AWS.
- Built reusable Terraform modules to standardize infrastructure provisioning across multiple development and testing environments.
- Implemented containerized deployments using Docker and Kubernetes, improving application portability and operational consistency.
- Configured secure cloud networking, including VPCs, firewall rules, VPN connectivity, IAM roles, and load balancers.
- Automated infrastructure deployment and application releases using Jenkins and GitLab CI/CD pipelines.
- Monitored production infrastructure using Cloud Monitoring and Grafana, reducing incident response time through proactive alerting.
- Assisted development teams with cloud architecture, infrastructure troubleshooting, and performance optimization.

Cognizant Technology Solutions, Cloud Engineer -Associate

03/2022 – 09/2022

- Developed CI/CD pipelines using Jenkins and GitHub to automate application build, testing, and deployment processes.
- Containerized enterprise applications using Docker to improve deployment consistency across development and production environments.
- Automated Linux server administration tasks using Bash and Python scripting.

- Configured Git branching strategies and deployment workflows supporting Agile software delivery.
- Collaborated with development and QA teams to improve release automation and deployment reliability.
- Reduced manual deployment effort through infrastructure automation and standardized deployment templates.

 EDUCATION

University of Cincinnati, Master of Science in Information Technology

01/2024 – 05/2025
Cincinnati, OH

- GPA – 4.0/4.0
- Coursework: IT Infrastructure Sustainability | AI & ML |Software development | Human-Computer Interaction

 TECHNICAL SKILLS

Cloud Platforms AWS (EC2, S3, Lambda, RDS, IAM, VPC, CloudFormation), Google Cloud Platform (Compute Engine, GKE, Cloud Run, Cloud Storage, Cloud SQL), Microsoft Azure (AKS, Functions)	Containers & Orchestration: Docker, Kubernetes, Amazon EKS, Google Kubernetes Engine (GKE), Azure Kubernetes Service (AKS), Helm	Infrastructure as Code: Terraform, CloudFormation, Infrastructure Automation
ToolsCI/CD & DevOps: Jenkins, GitHub Actions, GitLab CI, CircleCI, JFrog Artifactory, Maven, Gradle	Monitoring & Observability: Prometheus, Grafana, CloudWatch, Google Cloud Monitoring, Cloud Logging, ELK Stack	Programming & Scripting: Python, Bash, Java, Shell Scripting
Networking & Security: VPC, IAM, Load Balancers, VPN, DNS, SSL/TLS, Security Groups, Firewall Rules, Secrets Management	Databases & Storage: MySQL, PostgreSQL, MongoDB, Cloud SQL, Amazon RDS, Redis	Operating Systems: Linux (Ubuntu, CentOS, RHEL), Windows
Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket, Jira, Confluence	Cloud Architecture: Cloud Migration, High Availability, Auto Scaling, Disaster Recovery, Cost Optimization, Infrastructure Automation, Microservices	

 CERTIFICATIONS

- GCP Professional Cloud Developer
 - PegaAcademy Certified Pega Senior System Architect (PCSSA 8.8)
- GCP Professional Cloud DevOps Engineer
- PegaAcademy Certified Pega System Architect (PCSA 8.8)

 AI PROJECTS

- Fine-tuning Llama 2 LLM with Medical Data
- Preprocessed and curated large-scale medical datasets for domain-specific LLM fine-tuning, ensuring high-quality and structured input.
 - Fine-tuned Llama 2 using Hugging Face Transformers, optimizing the model for medical terminology and clinical tasks.
 - Evaluated model performance and implemented improvements, creating pipelines for secure and efficient deployment of the fine-tuned model.
